

The Central Improvement District is located in the Johannesburg CBD. Joburg's inner city is being turned into a vibrant and attractive area through various JDA initiatives that have been designed to regenerate the old town.

The vision for the CID is to create a compelling, clean, safe and well managed environment that captivates and entices its users. To create an environment that allows for a vibrant urban environment that contributes towards an overall community vision.

The CID is currently managed by a Precinct Manager and Operations Manager.

Precinct Manager  
Ingrid Shelton,
